

Satellite Navigation

Satellite Navigation on your BlackBerry Smartphone

Telmap Navigator for BlackBerry® displays beautiful dynamic full colour maps and provides the user with clear and accurate turn-by-turn navigation instructions in graphics, voice and text.

Enjoy a worldwide database of literally millions of restaurants, hotels, theatres and other Points of Interest. Stay connected with your friends and share locations via SMS. Access information on an as-needed basis to look up, navigate, direct dial and make reservations to any location you choose.

Features

- Enhance navigation experience - using moving maps, turn by turn voice, text and graphic instructions
 - Full pedestrian navigation that ignores vehicle turning and driving direction restrictions
 - Advanced search algorithms - intuitive location search for address, junction, or postal code, with unique POI search capabilities
 - Direct dialling to POIs from within the application - restaurants, hotels, theatres, etc
 - Enhanced connectivity via SMS - enabling sharing of address book and POI locations
 - Optimised routing calculation for fastest or shortest in-car/pedestrian route and for avoiding toll roads, motorways, and other specific elements
-
- Extensive content support - supporting premium content, such as real-time traffic, restaurants recommendations, and more
 - Print-quality dynamic colour maps - zoom-in/out, pan and point on map functionality
 - Global geographic coverage - with transcontinental routing and access to worldwide content covering Europe, North America, Brazil, Middle East, South Africa, Australia and New Zealand
 - Rapid spatial data transfers - utilising Telmap's unique compression technology

Real-time Navigation. Real-time Traffic.
